2. Course Description in Current University Catalog

3. Course Goals

The goal of CS 3613 is to give students an ability to develop and rigorously reason about abstract formal models of computations, and to learn the powers and limitations of such formalism. “Classical” models, such as finite automata / regular expressions, pushdown automata / context-free grammars, and Turing machines will be studied in depth.

4. Course Materials/References

5. Course Website, Class-Streaming, Recording-Videos, and Lecture Notes

Our course Website is maintained on the campus-wide online learning system Canvas, which can be accessed through “https://canvas.okstate.edu”.

Since the information in our class pages will be constantly updated, please check in Canvas regularly (Announcements, Assignments, Conferences, Modules, etc.).

General notes:

1. All class materials (announcements, lecture notes, assignments, etc.) will be disseminated on Canvas.

6. Homework and Examinations

There will be about 5-6 homework assignments, a few \(q\), where \(0 \leq q \leq 8\) unannounced quizzes, one test, and one final examination.

7. Course Grade

The course grade is based on the homeworks and unannounced quizzes \([40 - q]\)% on homeworks and \(q\)% on quizzes], test (25%), and final examination (35%). The passing letter-grade is determined by the following partition of the course grades:

\[D : [50, 60); C : [60, 70); B : [70, 85); \text{and } A : [85, 100]\]
8. Miscellaneous

1. **Lectures**: Lectures are not mandatory, but historically, students with active attendance/coursework have done significantly better on examinations than their less frequently attending classmates.

2. **Homework**: Problem sets form an important part of the learning in the course, and thus, you are required to do them in order to pass.

3. **Collaboration and Sharing**: You are encouraged to discuss approaches with other students on solutions of assigned coursework, but you must write up solutions on your own **independently** and acknowledge your source in the write-up for each problem. If you obtain a solution with help (e.g., through library or publicly available work, or academic work by other students — whether in this or previous semesters), acknowledge your source, and write up the solution on your own.

   **Notes**: Read relevant documents/guidelines about academic integrity at Oklahoma State University in Academic Integrity Resources at the following URL:
   
   https://academicaffairs.okstate.edu/academic-integrity/index.html

9. **Student Disability Services**

Student Disability Services and other Student Services are committed to providing support services to students with physical and learning disabilities. Please advise the instructor of desired academic accommodations, and notify Student Disability Services.

10. **Academic Dishonesty or Misconduct**

Refer to the section in “University Academic Regulations” in current “University Catalog” (http://registrar.okstate.edu/)

11. **Adding/Dropping/Withdrawing, Important Dates, and Syllabus Attachment**

1. **Test and Final Examination**: Tentative date for the test is March 1 (Tuesday), 2022.
   
   Adopting “Spring 2022 Final Exam Schedule”, the firm time/date for final examination is 10:00 – 11:50 am, May 3 (Tuesday), 2022 in regular class meeting place.
   
   Refer to the section in “Spring 2022 Final Exams”:
   
   https://registrar.okstate.edu/class\_schedule\_short\_courses/exams.html

2. **Adding/Dropping/Withdrawing and Important Dates**: Refer to the section in “Academic Calendar”:

   http://registrar.okstate.edu/

3. **Syllabus Attachment**: Refer to:

   https://academicaffairs.okstate.edu/student-support/index.html
