General Course Information

Pre-requisites, Co-requisites: Senior standing and ENGL 3323 or BCOM 3113 or BCOM 3223 with a grade of "C" or better.

Course Description:

The history and evolution of computing systems, providing the background for the analysis of the social impact of computers. The social implications of computer use and misuse with emphasis on the effects on the individual, society, and other human institutions. Social responsibilities of people involved in using or applying computers.

Required Text:

Student Outcomes

1. Communicate effectively in a variety of professional contexts. This requires an evaluation of written skills and student presentations.  
   Example: A presentation on conflicting legal issues surrounding data ownership in Europe and the United States.

2. Recognize professional responsibilities and make informed judgement in computing practice based on legal and ethical principles. Include an assignment or set of assignments which specifically address this criterion.
   Example: A term paper on conflicts over intellectual property, inappropriate business practices, or ethical considerations in artificial intelligence.

**Grading Criteria**

The grade will be determined as described below.

- **Quizzes [3]:** 30%
- **Term Paper:** 15%
- **Video Presentation [Data Ownership]:** 15%
- **Final Exam:** 10%
- **Discussion Forum:** 30%

Grades are assigned according to the following scale:

- [>=90%] A
- [80-89%] B
- [70-79%] C
- [60-69%] D
- [0-59% ] F

**Late Work**

The reading / discussion part of the class cannot be made up. **The critiques also must be turned in on time**, and cannot be turned in late.
### Readings and Discussion

**Discussion** is a big part of this class. Thus reading and participation in the online (Canvas) discussion will be required. For each reading, you must write a short one page summary, which must be turned in on time. There will be about one online discussion per week. Each discussion will have two phases.

Before starting each discussion, you should read the assigned readings, and then summarize them and turn in your summary to Canvas.

The second phase of the discussions will consist of reading each-other’s comments and responding to them. You should read many of the comments that other class members make, and respond to at least 2 of them for each discussion. The discussions cannot be made up, so make sure to do them while they are open.

### Term Paper

The assignment in this class will be a term paper which will be a discussion of a social issue related to computing of your choice. In your paper you should provide a depth of discussion about the topic, thoroughly explain the different points of view, and then pass feedback on each one. It is not sufficient to summarize facts. You must identify social, ethical, or technological issues related to your topic, discuss them, and try to steer the discussion toward your own conclusions.

To help with your term papers, a proposal will be required a few weeks before the actual paper is due along with an annotated bibliography.

### Presentation

You will have to present on conflicting legal issues surrounding data ownership in Europe and the United States.

Like the term paper, the presentation will go through a draft cycle.

### Cheating

Copying a paper from another source and passing it off as your own is plagiarism, and it is not acceptable. Turning in a plagiarized draft for the term paper will result in an automatic F for the course. Also, keep in mind that everything you quote from an outside source in any of your papers must be specifically cited, with an entry in a bibliography.

### OSU Academic Integrity Policy:

OSU is committed to maintaining the highest standards of integrity and ethical conduct. This level of ethical behavior and integrity will be maintained in this course. Participating in a behavior that violates academic integrity (e.g., unauthorized collaboration, plagiarism, multiple submissions, cheating on examinations, fabricating information, helping another person cheat, unauthorized advance access to examinations, altering or destroying the work of others, and altering academic records) will result in an official academic sanction. Violations may subject you to disciplinary action including the following: receiving a failing grade on an assignment, examination or course, receiving a notation of a violation of academic integrity on your transcript, and being suspended from the University. You have the right to appeal the charge. Go to [http://academicintegrity.okstate.edu/](http://academicintegrity.okstate.edu/) for a video on OSU’s academic integrity policy and additional information.
